

Finishes with Resista® –
Add some special touches

For all HOPPE door- and window handles ...

Trendy finishes with Resista®

The handle of excellence is now available in several new trendy finishes: four new colours – each available in either a glossy or satin effect – add just the right touch that suits the individual interior design style.

Dark architectural fittings in charcoal and black can, for example, enhance the impact of colourful details of your furniture or lend even more elegance to a muted tone-in-tone interior design style.

The warm copper goes well with natural wood shades and brass-coloured finishes, for instance, suit luxuriously decorated homes thanks to their gold-like shade.

The high-quality appearance of the new finishes is long-lasting, even with intensive use or in harsh climatic conditions. They are equipped with Resista®, have a ten-year surface guarantee and are subject to continuous quality inspections. When new, they meet the requirements of the European standard EN 1670.

As with all of our products, HOPPE handles with trendy finishes and Resista® are characterised by the following **brand attributes**:

Product attributes	<ul style="list-style-type: none">• present important information on a product or a benefit of the product• are identified with the pictograms designed by HOPPE

Attribute

10-year guarantee
on mechanical operation

Made in Europe

DIN EN ISO 14001
Environmentally-considerate manufacturing

Resista®

10-year guarantee on the surfaces of all HOPPE hardware with Resista®

Quick-Fit

With the HOPPE Quick-Fit connection, door handles can be installed in one simple step – and to last! Just fit together – and it's done!

Quick-FitPlus

With HOPPE Quick-FitPlus, handle sets are mounted in next to no time. A few seconds is all it takes to mount door handles and flat roses. The procedure is easy and precise, with no screws or tools required .

Secustik®

Secustik® window handles contain a patented jamming-device which provides integrated security. This makes it more difficult to move the window fitting unlawfully from outside.

VarioFit®

Window handles with VarioFit® adjust their spindle length to correspond to the depth of the window profile with which they are being used.

Category of use grade 2 (3, 4)
DIN EN 1906
